Our Network

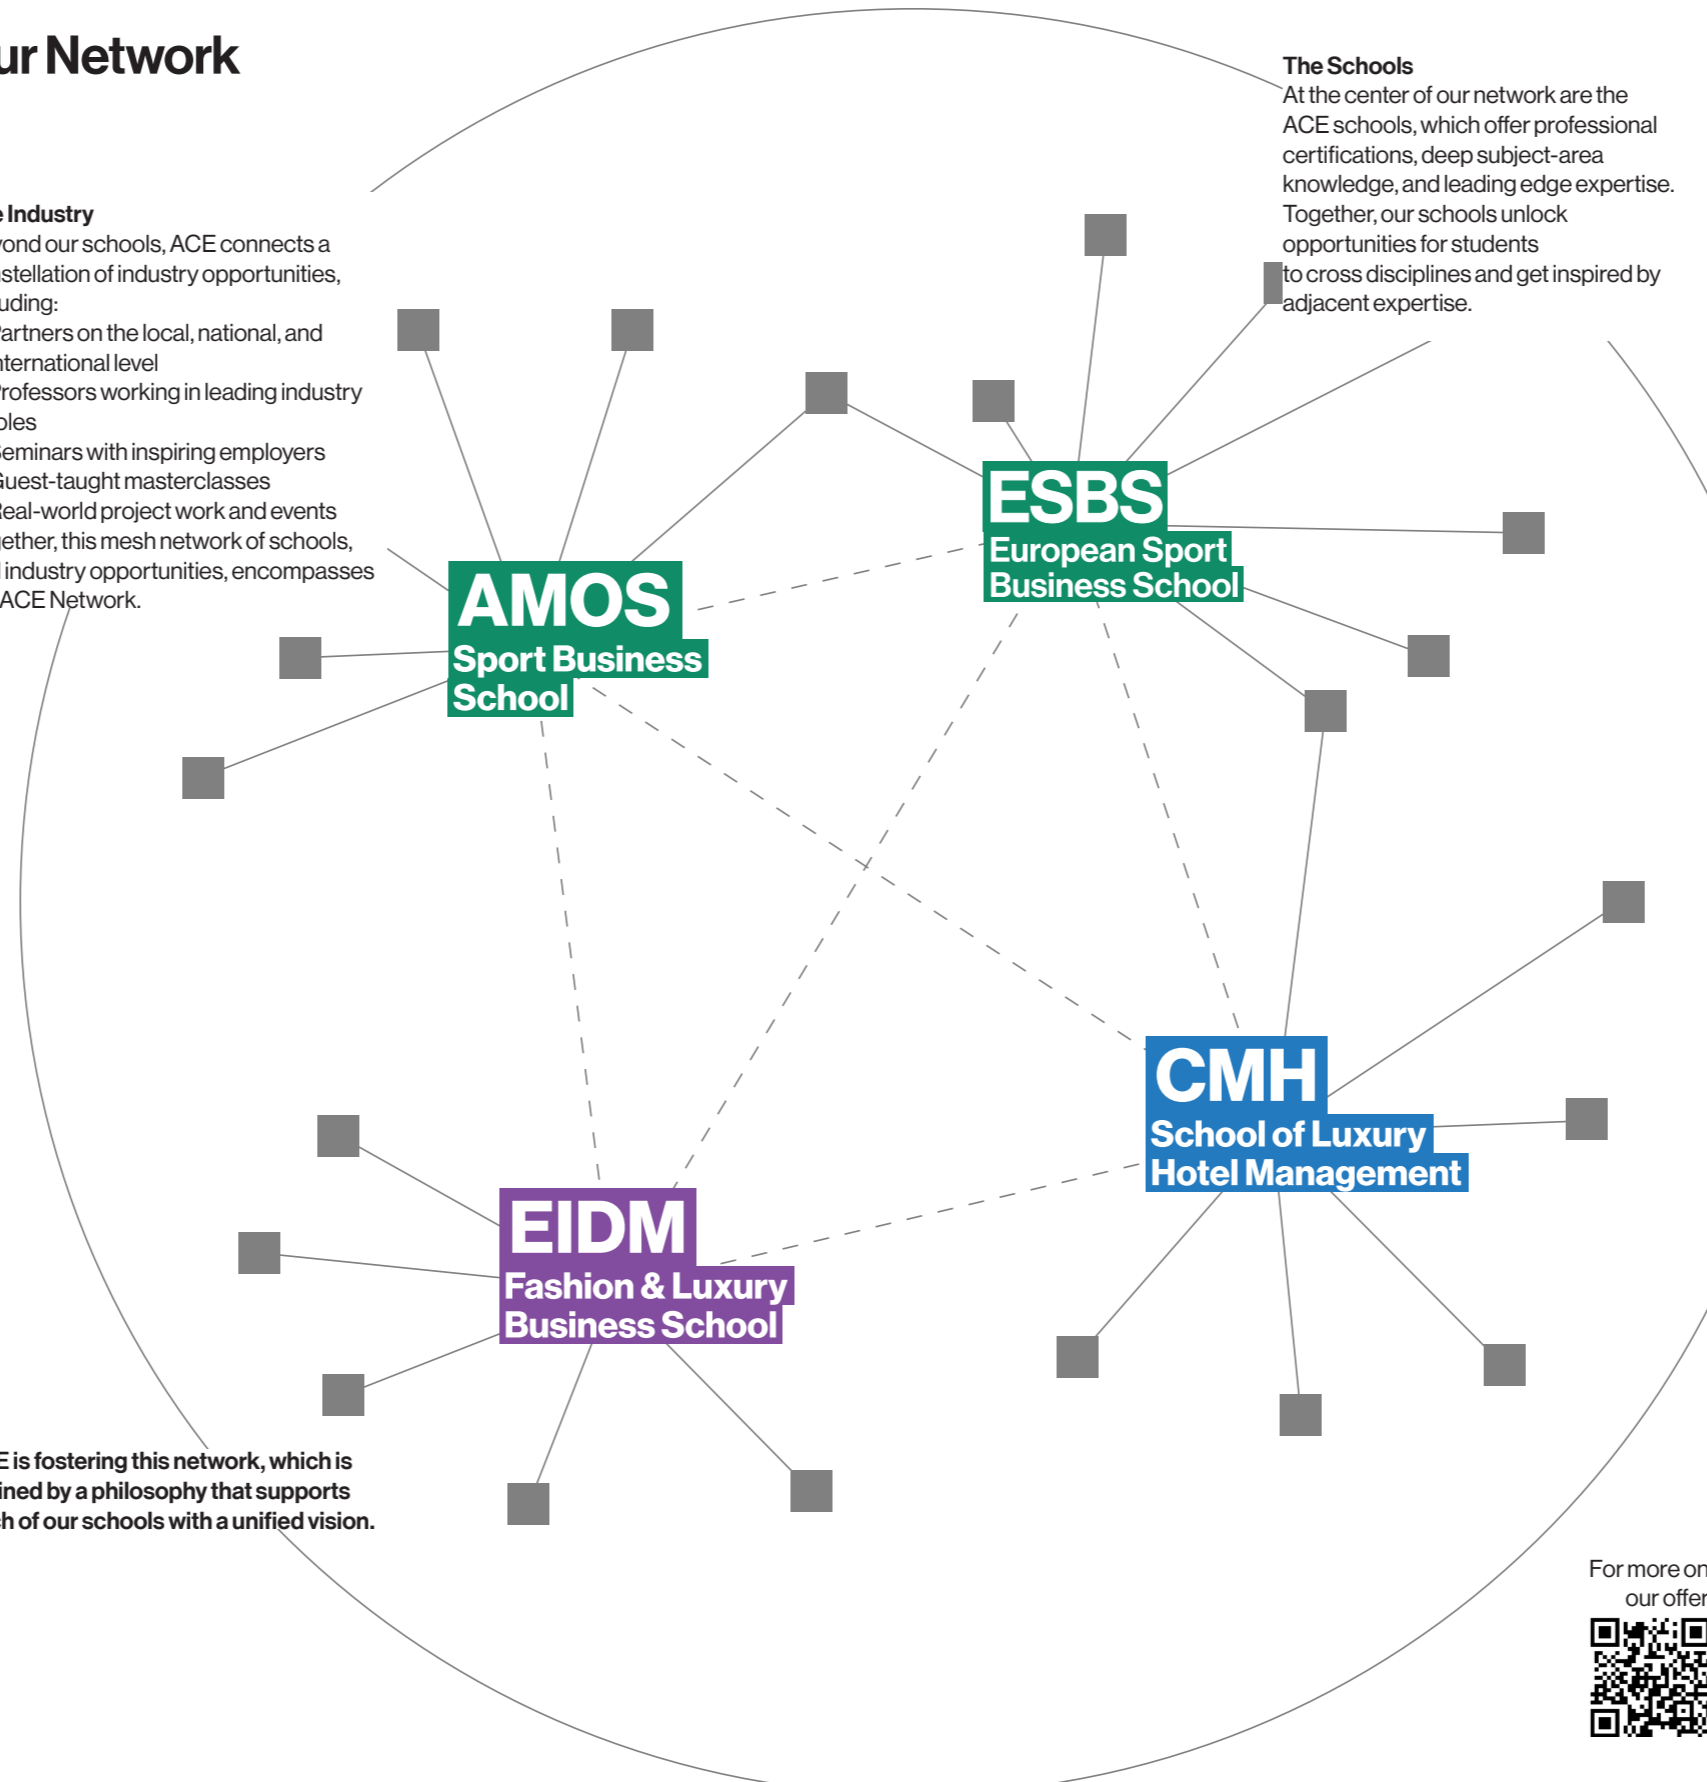

The Industry

Beyond our schools, ACE connects a constellation of industry opportunities, including:

- Partners on the local, national, and international level
- Professors working in leading industry roles
- Seminars with inspiring employers
- Guest-taught masterclasses
- Real-world project work and events

Together, this mesh network of schools, and industry opportunities, encompasses the ACE Network.

ACE is fostering this network, which is defined by a philosophy that supports each of our schools with a unified vision.

The Student Experience

"After having produced my end of school fashion collection, I launched my brand two years ago. Then, I had a gap year before joining EIDM. This is the reason why I wanted to enrol at EIDM as they also provided courses focusing on entrepreneurship. That was really the case in Mastère 1 when we had to develop a real entrepreneurship project. We had to pitch it to a business incubator. The project went on while I was having an internship. As of today, the brand exists, and the networks are ongoing."

Louisa, Master 2 student and entrepreneur in the fashion industry

"EIDM helped me a lot during my 3 years of training thanks to the pedagogical team and the lecturers who were all great listeners. Indeed, the lecturers allow enough time to each student; practical cases are relevant and easy to get. During my first year, I had a student open-ended contract at Maje as a sales advisor; then, during my second year I carried out a 3-month internship at a salesperson at Christian Dior Couture. At the end of this internship, I joined Hermès for a 5-month fixed-term contract."

Audrey, Bachelor 3 student
